EDUCATION

UNIVERSITY OF WISCONSIN-LA CROSSE (BSce)

La Crosse, Wisconsin, USA

Major: Computer Science

Expected Graduation: December 2026

Minor: Mathematics, Music

Dean's List Fall 2024, Spring 2025, Fall 2025, Spring 2026

CGPA: 3.69 / 4.0

Social Media Coordinator for CODERS & DOC of the International Student Organization

SKILLS

Programming Languages: Java, SQL, Python, JavaScript, jQuery, C

Web & Front-End Technologies: HTML, CSS, jQuery, AJAX, Angular, Mongo, Node.js, Express.js, Postman

Tools and Technologies: Git, Confluence, Jira, Canva, Figma, Microsoft Office, Jupyter Notebook, VS Code

Relevant Coursework: Object-Oriented Programming, Data Science, Database Management, Web Applications

Languages: English, Mandarin, Cantonese, Malay

Soft Skills: Strong communicator with excellent analytical, problem-solving, multitasking, and learning abilities.

RESEARCH EXPERIENCE

UW-LA CROSSE CS & CPE DEPARTMENT

La Crosse, Wisconsin, USA

Undergraduate Research Fellow | PyTorch, EEG Analysis

2026

- Awarded the Dean's Distinguished Undergraduate Research Fellowship grant for a 3-month pilot study on motor imagery EEG-based biometric authentication for Parkinson's Disease.
- Supporting EEG data acquisition and preprocessing, including filtering, artifact removal, epoching, and time-frequency analysis of motor imagery tasks.
- Analyzing subject-specific neural patterns to evaluate feasibility of EEG-based biometric recognition.

ACADEMIC PROJECTS

Aura Fitness and Nutrition App | Angular, Node.js, Express.js, MongoDB, REST APIs

- Developed a full-stack tracking application where users can log workouts, meals, and progress.
- Built RESTful API endpoints to support CRUD operations for workout and meal data.
- Designed a dynamic Angular front end with user dashboards, interactive forms, and role-based functionality for users and administrators.

Multiverse TCG Search Engine | JavaScript, AJAX, REST APIs, DOM Manipulation

- Engineered a web application performing parallel AJAX fetches from Scryfall and TCGDex APIs to aggregate Magic and Pokemon card data.
- Developed a dynamic UI to merge, sort, and render unified search results with a detailed interactive view.
- Optimized client-side performance by implementing asynchronous data handling for seamless user interactions.

RELATED EXPERIENCE

TROOPERS MALAYSIA

Kuala Lumpur, Malaysia

Product Manager Intern

May 25 – August 25

- Authored detailed Product Requirement Documents to define feature scope, user stories, technology requirements, and success metric and conducted UAT tests and user validations.
- Led a product release cycle from testing to evaluating technical feasibility, collaborating with business operations, developers and designers to ensure alignment with business goals.
- Assisted in developing training decks and materials to support internal onboarding.

UNIVERSITY OF WISCONSIN- LA CROSSE COMPUTER

La Crosse, Wisconsin, USA

SCIENCE AND COMPUTER ENGINEERING DEPARTMENT

August 24 – Present

Social Media Coordinator

- Developed and executed a content strategy and visually engaging graphics and short-form videos across multiple platforms (Instagram, LinkedIn, Facebook, Spotify) to increase engagement and promote department activities.
- Collaborated with faculty and students to highlight research projects, tutoring services, and departmental events.
- Maintained organized workflows and handled multiple high-priority content deadlines.
